

OMEGATEX™

HURRICANE SCREEN
ENGINEERED WITH **DUPONT Kevlar®**

Scientifically Developed Fabric. Hurricane Strength Protected.

OmegaTex™ - Twitchell's unique fabric construction woven with PVC coated TEXTILENE™ and **Kevlar®** core yarns in the fill make **OmegaTEX™** the right choice for any fixed or retractable hurricane screen application that can be used 365 days a year without the worry of degradation caused by the sun's harmful UV rays. In addition to its strength and UV resistance, **OmegaTEX™** offers protection from wind, rain, insects, dust/debris, and curious outsiders and has passed certification under the Dade County Projectile Test and High Velocity Test when used with screening systems NOA labeled and Miami-Dade tested.

Dupont™ Kevlar® fiber contains materials five times stronger than steel! Textilene™ brand fabrics are incredibly UV stable, flame resistant, easy to clean, and engineered with antimicrobial agents. Made with a non-phthalate plasticizer and composed of REACH compliant materials, **OmegaTEX™** meets NFPA and CSFM standards.
